Outcome of a course:

- Students were able to understand and navigate the AutoCAD interface, use basic commands and tools, and gain an understanding of the features of the software.
- The course equipped students with the skills to create 2D technical drawings using AutoCAD, including floor plans, elevations, and sections.
- Students were able to create 3D models using AutoCAD, including objects and architectural elements.
- The course helped students learn how to use AutoCAD efficiently, using commands, shortcuts, and automation to save time and increase productivity
- The course allowed them for precise measurements and accurate design, and students learned how to take advantage of these features to create high-quality designs.

REVIT Workshop

Title: REVIT Workshop

Time: 9:00 AM to 5:00 PM

Date: 01 august to 16th September 2019

Academic year: 2019-2020

Location: Computer Lab, Yashoda College of architecture

Faculty coordinators: Ar.Snehal Shedge

Workshop Description:

This workshop is designed to provide participants with a comprehensive understanding of REVIT, a powerful and widely used software tool in the field of architecture. Over the course of seven days, we will explore the capabilities of REVIT and its applications in architectural design, modeling, documentation, and collaboration.

Led by experienced REVIT experts, this workshop offers a unique opportunity for participants to enhance their REVIT skills and gain hands-on experience in a supportive and interactive environment. Whether you are a student, a professional, or an architecture enthusiast, this workshop will equip you with the knowledge and skills necessary to leverage the full potential of REVIT in your architectural projects.

Objectives:

- To develop a comprehensive understanding of REVIT: Gain a solid foundation in the functionalities, tools, and features of REVIT software, and become proficient in navigating its user interface.
- To acquire essential modeling skills: Learn how to create and manipulate 3D models using REVIT, including architectural elements, structural components, and MEP systems.
- To enhance documentation capabilities: Explore REVIT's documentation features and learn how to generate accurate and detailed construction drawings, schedules, and material takeoffs.
- To Explore visualization and rendering techniques: Discover how to apply materials, textures, and lighting to create realistic visualizations of architectural designs and improve presentation quality
