# NATIONAL CONFERENCE ON EMERGING TRENDS IN ARCHITECTURE 2018

## CERTIFICATE OF APPRECIATION

This certificate is proudly presented to

*Mr. Rakhi Begampure*

for Contribution and Presentation on the paper titled  
Theory Based Design Practice Today  
in NCETA 2018 held at MIT School Of Architecture,  
Rajbaug, Loni Kalbhor, Pune on 11<sup>th</sup> & 12<sup>th</sup> January 2018.

**Ar. Shilpa Nagapurkar**  
Convener

**Mrs. Jyoti Dhakane**  
Chief Convener

**Dr. Sunil Rai**  
Vice Chancellor

**Prof. Dr. Mangesh Karad**  
Executive President

**Abstract:**

*The current trend in architectural community is highly focused on sustainable design measures or designing a building which maximizes the utilization of the energy available from natural resources. This paper presents an analytical study on the effect of the climate on the morphology or the form, shape and other parameters of any public building.*

*Discussion focuses on the climate related analysis of the building in the context of the building envelope. The issue of sustainability without consideration of the basic principles of architecture related to climate is put forth initially. Later section deals with the study of Variations in various climatic factors present in three prominent climatic zones of India. The main outcome of this analysis is on various types of the form and their behavior under different climatic zones. The two major constraints used to study the morphology were perimeter to area and surface to volume ratios of the building in prominent three climatic zones of India. The present condition on the energy consumption by the buildings in India is taken into account to analyze the public buildings.*

*A comparative analysis on of buildings present in three prominent climatic zones is done to conclude that climate of particular area has its effect on buildings form, shape, orientation i.e. building morphology.*

**Abstract:**

*Tourism is recognized as a fast growing industry. It has potential to transform economies of the country. It has great capacity to create large scale employment. The Indian economy is also undergoing a many transformation. Tourism in India is growing, and it has rich potential of natural resources for tourism such as heritage, scenic beauty and culture. So tourists are attracted to India. There are many tourist destinations in India which contain huge potential of natural resources, if we utilize these potential it will benefit to improve socio-economic relation, employment creation and, infrastructural development of the region.*

*The paper highlights the importance of the sustainable tourism by outlining the strength and challenges of the Indian tourism industry. Through the paper development of sustainable tourism is also discussed. This study has been done by the primary observation, data collection, articles, reports and over all content, analysis of the secondary data of sustainable strategies.*
